

In order to add token to be displayed in MetaMask you'll need to do as follows:

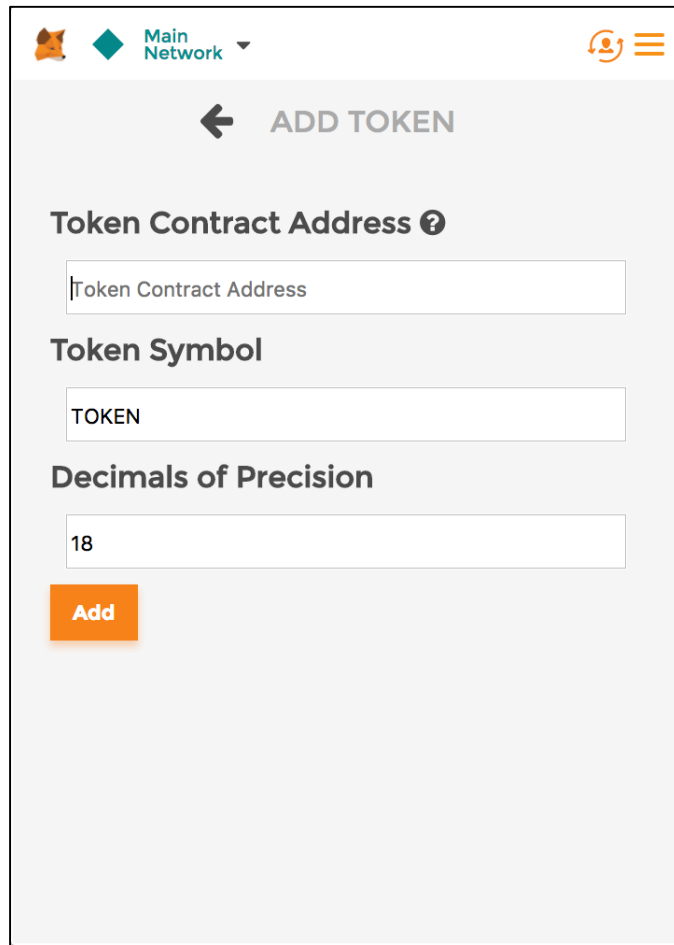

1. Open your MetaMask Chrome plugin and be sure that you are using Main Network

2. Open tab `Tokens` and click button `Add Token`

3. In the field `Token Contract Address` put token address

The screenshot shows a mobile application interface for adding a token. At the top, there is a status bar with a cat icon, a diamond icon, and the text "Main Network" with a dropdown arrow. To the right, there is a user profile icon and a hamburger menu icon. Below the status bar, there is a back arrow and the text "ADD TOKEN". The main content area has three sections: "Token Contract Address" with a question mark icon, "Token Symbol", and "Decimals of Precision". Each section has a corresponding input field. The "Token Contract Address" field contains a placeholder "Token Contract Address". The "Token Symbol" field contains the text "TOKEN". The "Decimals of Precision" field contains the text "18". At the bottom left, there is an orange button with the text "Add".

4. Click `Add` button
